<b>Regional Water Board</b>	Region 3 - Central Coast	<b>OUTCOMES:</b> <input checked="" type="checkbox"/> Satisfactory <input type="checkbox"/> Unsatisfactory
<b>Total Project Cost</b>	\$100,500	
<b>SEP Funding</b>	\$100,500	
<b>Approval Date</b>	May 2013	
<b>Project Category</b>	Monitoring	

### Summary

The Central Coast Ambient Monitoring Program (CCAMP) is the Central Coast Regional Water Board's regionally scaled water quality monitoring and assessment program. The purpose of the program is to provide scientific information to Regional Board staff and the public, to protect, restore, and enhance the quality of the waters of central California. The CCAMP has a Groundwater Assessment and Protection (GAP) component as well. There were two SEPs in 2013 which contributed to the CCAMP – GAP project; details are included in the table below the adjacent Location Map.

The CCAMP endowment is held at the Bay Foundation of Morro Bay. Contributions for 2013 are being reserved until 2014/2015 for expenditure on implementation of the Region-wide domestic well project, which includes: a regional outreach and sampling program for domestic well owners to address the severe health threat from nitrate pollution in domestic wells.

In the future, Region 3 will not direct SEP funding to either CCAMP or GAP projects. They will only direct SEP funding to discrete projects, or accounts that disburse the funds to discrete projects: like their Low-Impact Development account. This change is being made so that Region 3 can better track their SEPs in accordance with the 2009 Water Board SEP Policy.

### Location Map

### 2013 SEPS FUNDING CCAMP-GAP

Discharger	Date	Amount
City of Santa Barbara	5/14/2013	\$55,500
California Department of Corrections and Rehabilitation	5/23/2013	\$45,000
<b>TOTAL</b>		<b>\$100,500</b>
